 - a) Aircraft in difficulty and requires immediate assistance
 - b) Aircraft is threatened by grave and imminent danger and requires immediate Assistance
 - c) Aircraft is facing radio failure
 - d) Aircraft wants to relay urgency message

5. No civil aircraft can fly within international boundary:
 - a) 15 NM
 - b) 10 M
 - c) 5 NM
 - d) 15 KM

6. Runway end lights are:
 - a) Red
 - b) White
 - c) Yellow
 - d) Blue

7. When descending through transition layer pilot will report as:

- a) Flight level
- b) Height
- c) Altitude
- d) All the three above

8. What does the minima for CAT I (based on DH and RVR):

- a) DH not lower than 60 M and RVR 550 M
- b) DH lower than 60 M and RVR 550 M
- c) DH not lower than 50 M and RVR 500 M
- d) DH lower than 50 M and RVR 500 M

9. Series of white flashes by ATC, what does it mean for an aircraft:

- a) Aerodrome unsafe to land
- b) Give way to another aircraft continue circling
- c) Return for landing
- d) None of the above

10. A series of white flashes towards an aircraft in flight from control tower:

- a) Give way to another aircraft
- b) Has no meaning
- c) Land at this aerodrome and proceed to apron
- d) Return to starting point

11. If a person dies of cholera then to bring his dead body:

- a) Inform that office of aerodrome
- b) Can't bring the dead body
- c) Can bring the dead body in a wooden box
- d) It should be enclosed in a hard wooden box which should be enclosed in Zinc
Or Tin lined wooden packing case filled with saw dust, impregnated with Carbolic
Powder at a 48 hrs notice

12. Aircraft observes green or red blasting, it indicates:

- a) Over prohibited or danger area
- b) Distress
- c) Military installation
- d) Urgency

13. Emergency procedures and in flight procedures are in:

- a) Operation manual
- b) Route guide
- c) AIP
- d) AIC

14. You are entering from one FIR from another FIR, how much time before you should Inform:

- a) 20 mts
- b) 15 mts
- c) 10 mts
- d) 30 mts

15. No aircraft can fly within how much distance of international boundary:

- a) 15 NM
- b) 10 M
- c) 5 NM
- d) 15 KM

16. An aircraft use ILS if:

- a) It can use ILS if Localizer is in operative
- b) Cannot use ILS if either Localizer or Glide slope is inoperative
- c) Can use ILS if Glide slope inoperative
- d) None of the above

HOUSE TEST PAPER 1

PLEASE SOLVE THEM WITHOUT REFERRING TO THE ANSWERS

1. Pilot in command whether manipulating or not is responsible to comply with Rules of Air. (True or False)
2. Aerodrome beacon:
 - a) Red/White flashes
 - b) Red/Green flashes
 - c) Green/ White flashes
3. Aircraft on IFR shall maintain clearance of at least 1000 ft within:
 - a) 8 km (5 miles) from the route
 - b) 5 km (3 miles) from the route
 - c) 1.5 km (1 mile) from the route
4. Aircraft flying on the route under IMC maintaining 5000 ft, visibility minima from VMC is:
 - a) 8 km (5 miles) from the route
 - b) 5 km (3 miles) from the route
 - c) 1.5 km (1 mile) from the route

HOUSE TEST PAPER 2

PLEASE SOLVE THEM WITHOUT REFERRING TO THE ANSWERS

1. Petroleum in bulk means:
 - a) Less than 900 litres
 - b) Same as 900 litres
 - c) Exceeds 900 litres

2. Runways markings are:

- a) True
- b) Magnetic
- c) Compass

3. DME separation is:

- a) 50 NM
- b) 30 NM
- c) 20 NM
- d) 10 NM

4. Leaflet dropping is approved by:

- a) District Magistrate or Commissioner of Police
- b) DGCA
- c) Aerodrome Officer
